

LAST MILE INSULATED VAN KIT SOLUTIONS

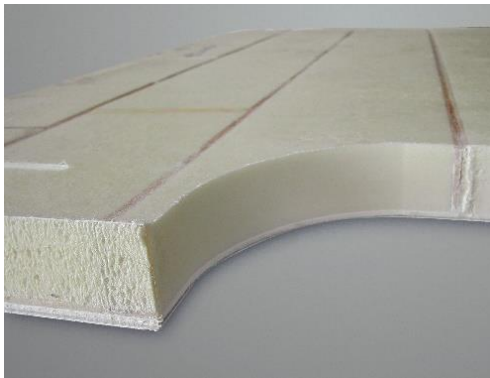

Kidron's Polarvan van kits are a quick and convenient solution to your last mile delivery needs. Designed to fit a wide range of popular van models specifically engineered to ensure fast assembly and fit.

Polarvan van kits panels are CAD-CAM designed and manufactured with our exclusive "Fit to Shape" assembly system technique, that allow for maximum load capacity.

- Interlocking Kit Assembly
- Impermeable Liners
- Light, Strong Compact Panels

THE KIDRON DIFFERENCE

One Crate Delivery | Fast Upfit
Available Inventory | Experienced Installers
Refrigeration Partnerships

PANEL TECHNOLOGY

Polarvan van kits are assembled using compact vacuum sandwich panels made of PRFV (fiberglass and gelcoat) laminate and a polyurethane foam core.

Reinforced panels create a sturdy insulated structure, strong and safe enough for cargo control or shelving. Standard panel insulation is 3" thick.

Floor, roof, front head and side walls can be reinforced according to customer requirements.

EXPERIENCE INNOVATION

From the Kidron brand you trust, for quality fit, finish and function for last mile delivery.
